

Airflo Two-Handed Line to Rod Chart

This Spey Line compatibility chart is provided as a reference to help match Airflo fly lines to your specific rod of choice. Please keep in mind these recommendations serve as a starting point and are based on the best match to bring an "All-around" performance out of the rod. If you like a little quicker, stiffer feel than drop a line weight, consequently for a softer, slower feel move up a line weight. With all things "Spey" personal choice and casting style play a huge part in one's "Perfect Line." If you have any questions or do not see your rod listed please give us a call at 360-694-2900.

Maker	Series	Model	Length	Line Weight	Grain Range	Speydicator	Delta Spey	Skagit Compact	Skagit Switch	Scandi Compact	Tactical Steelhead	Rage Compact
